Performance Update

During Feb'11 average returns for Income Funds stood at 14.41%. Category returns remained volatile ranging between 104.65% and -2.86%. TFC price fluctuations and changes in MUFAP revaluation prices remain the primary cause for volatility in NAVs. Dawood Money Market Fund was the top performer delivering 104.65% return. Feb'11 average returns for Money Market and Government Security Funds increased to 12.80%. Returns for 12mo and 8mo YTD averaged 10.90% and 11.47% respectively. Improved returns are a result of the hike in the discount rate which impacts T-bill yields and profit rates for bank deposits.

Average returns for Islamic Income funds stood at 8.98% during Feb'11. Overall, Islamic Income Funds have performed positively. This was primarily due to appreciation in all Sukuk prices. KIIOF was the only fund in this category that delivered a negative return (-9.06%). Returns for 12mo and 8mo FY10 averaged 10.17% and 7.75% respectively. For the month Feb'11 average returns for Islamic Money Market stood at 11.09%.

The calendar year started on a positive note as the KSE 100 index crossed 12,000 levels and the month of January closed at 12,359.63 levels. In February however, the index took a thrashing of 1,070.4 and the KSE100 index plummeted by -8.66% to 11,289.23 levels. Average returns for pure equity funds outperformed the KSE 100 index and stood at -5.88% for Feb'11. During 12mo returns for pure equity funds averaged 18.53% outperforming the KSE 100 returns of 16.12%.

During Feb'11 average returns for Islamic Equity Funds decreased to -3.55% with 12mo average returns down to 17.72%. During Feb'11 Balanced and Asset Allocation Fund returns showed decline of -4.19% with 12mo returns averaging 11.51% up from last month's 12mo average return of 10.12%. The decrease in returns was due to a nosedive plunge of the equity market as KSE100 index fell by -8.66%. Moreover, TFCs/Sukuks in Islamic Asset Allocation Funds fluctuate in price and further impact returns.

Money Market & Fixed Income Update

The Central Bank's decision to maintain the discount rate at 14% for the next 2-month period surprised the market. Respite in government borrowing from State Bank of Pakistan (SBP), stability on the external front, and multi-partisan efforts to improve the fiscal position of the economy were the main reasons behind the unchanged stance of the Central Bank.

Most players in the fixed-income market had priced in an increase in the discount rate by at least 50bps. Consequently in the weeks leading up to the monetary policy announcement on Feb 01, 2011, investments had largely been concentrated in shorter-tenor instruments. The maturities of these short-tenor instruments were supposed to coincide with the increase in discount rate while participants were gearing up to place their investments at higher rates. However, status quo led to decline in rates across the board. As Govt. papers offered relatively higher rates than Repos/Reverse Repos, participants refocused their attention on these instruments. Given relatively loose liquidity, the SBP intervened on the last trading day of the week, mopping up PKR 25bn from the market for a 6-day period at an average rate of 12.2%.

During February, the money market remained short of liquidity as there was a net outflow of PKR 81Bn from the system. While the T-Bill auctions during the month were ~PKR 100Bn higher than maturity and there was a PIB auction of PKR 22Bn, the market was supported to a certain extent by SBP injections. During the month, the gross injection was around PKR 69Bn which were concentrated around the T-Bill auction settlement date. The auctions yet again saw participation remaining concentrated in the 3-M tenor.

T-Bill auction cut-off yields for the month of February are summarized below:

T Bill Auction			
	Cutoff yields (Feb9,11)	Cutoff yields (Feb23,11)	Change in yield
03 Months	13.53	13.49	-4 bps
06 Months	13.69	13.69	-
12 Months	13.86	13.86	-

Source: SBP, IGI Fund Select

Market yields had adjusted upwards by 15-40bp in anticipation of a rate hike during January led by the 3-M T-bill. Hence February saw 3M T-Bill yields decline by ~18bp to 13.49% as yields were lowered during the T-Bill auction as well. However the yields on 6M and 12M T-Bill remained almost flat at 13.69% and 13.86% respectively.

The SBP conducted its PIB auction on Tuesday, February 15, 2011. The target for the auction was set at PKR 20 billion. SBP raised PKR 6.9 billion through the sale of three-year bonds, PKR 1.5 billion from five-year and PKR 17.58 billion from ten-year bonds. The cut-off yield came down as expected. The coupon rate is set at 11.25% for three-year bond, 11.50% for five-year bond, 11.75% for 7-year bond, 12% for 10-year bond, 12.5% for 15-year bond, 13% for 20-year bond and 13.75% for 30-Year bond. Cut-off yields for PIB auction are summarized below.

Equity Market Feb'11 Review

KSE-100 stopped the previously robust trend in Feb'11 where 1Q has historically been a strong period for the market. 8.7% MoM decline for KSE-100 is the worst Feb showing in last 20 years and is only the 6th negative MoM Feb reading since 1992. Feb'11 inflows for KSE were positive at USD 5.5Mn (-91% MoM) but at their lowest since Dec'09. Underperformance vs. region in Feb means KSE is among the region's YTD laggards now (-6% YTD). The KSE 100-share index opened the month at 12,359.36 points and closed at 11,289.23 points with a loss of 1,070.13 points.

CY10 Monthly Foreign Flow Trend (USD mn)

Source: IGI Fund Select

Individual stock interest fizzled out post announcement as payouts again upstaged earnings in driving investor interest. In addition, tense Pak-US relations over diplomatic immunity of Raymond Davis concerned investors over potential follow through impact on sovereign flows. On the regulatory front, the finer details of both leverage product (MTS) and capital gains tax (CGT) remained elusive resulting in an uncertainty regarding their impact on the market going forward.

CPI inflation weakened to 14.19% YoY in Jan'11 as compared to Dec'10 when it was 15.5% YoY. Exports in Jan'11 came in at record level of US\$2.3bn, up 9.5% MoM and 38% YoY. In 7MFY11, exports are up 23% YoY to US\$13.3bn, while imports are up 17% to US\$22.6bn. Trade deficit for 7MFY11 is up 9.2% to US\$9.3bn. Current account for the Jan'11 showed a deficit of US\$62mn which was a surplus of US\$570mn in Dec'10. Although remittances in Jan'11 increased by 24% YoY to US\$826mn, it decreased to 4% MoM.

FBR tax collection has registered at PKR 770Bn in 7MFY11, up 11%YoY. Therefore, full-year FY11 tax collection is unlikely to achieve the target. Consultation with IMF to reduce the FY11 tax collection target to PKR1.6Tn are in process but even this may only be achieved with difficulty. Below target revenue collection may lead to the fiscal deficit exceeding 5% of GDP in FY11. It may also necessitate further deficit monetization, thereby adding to inflationary pressures.
